Globalizing and Organizing

# Solid Waste

## Management (SWM) Icons

The **Solid Waste Management (SWM)** icons were developed as part of WIEGO's **Reducing Waste in Coastal Cities Project** ([www.wiego.org/rwcc](http://www.wiego.org/rwcc)) as a tool for waste picker organizations and their members.

Uses for the icons include:

- To map and explain waste management systems in participatory settings.
- To strategize new waste management interventions.
- On posters and in presentations to explain waste systems, including for proposals.

**Featured Photos:** Workers from Ghana's Kpone Landfill Waste Pickers Association using the SWM Icons to map their solid waste system and strategize alternative livelihood options.
